ABOUT CRITICNEST

An independent review desk, not a content farm.

CriticNest reviews the AI, SaaS, security and hosting tools that founders, freelancers and small teams evaluate before they buy. Every review is researched and written by one operator with real SEO and software experience, so the analysis goes deeper than a rewritten feature list.

The editorial promise: live-verified pricing, honest scores that include the downsides, and clear affiliate disclosure on every page. Readers arrive at the moment of decision and convert because the recommendation is credible, not hyped.

Run by Ashikur Rahman, SEO and AI-search specialist and founder of hey-ash.com, working in search since 2017.
